MANAGER'S MESSAGE

LMR enters its' 25th year with a renewed vigour to deliver service, savings and solutions to the membership. Quite a lot has changed since 1991, but many of the fundamentals are the same. Our ethos of being here to help you better develop and grow your businesses by working on your behalf to deliver machines, inputs and labour (amongst other things) at best price and in a timely way to a high standard remain our key motivators. The farming environment has changed. Farms are much larger and typically more focused in their activities than they were. Many of you will also have diversified in to income streams that don't rely on commodity prices. LMR has adapted to the changes and has members offering a truly staggering range of services. We look forward to strengthening our relationship with you as we embrace the future. Although the winter has so far passed without serious weather in our region there is still time for snow and ice which could have us calling you for snow clearance and gritting work. With spring around the corner, the livestock farmers can take advantage of better prices on the group deal for lambing consumables, details of which are within this newsletter. Members are also benefitting from the unexpectedly low fuel price which is welcome when enterprise margins are under stress. Please contact LMR with your fuel requirements, whether it is for tractor diesel, derv or heating oil. We also have great prices on Ad Blue and are pleased to be able to supply so many of our members that use this product. Please remember that LMR has contractors ready to provide cultivation and drilling services for spring crops, including maize as well as spraying and spreading services. Due to the mild weather, pigeons are already on oilseed rape, so please call if you need bottled gas. Farmers are calling

with their seed and fertiliser requirements as spring approaches. Please call LMR for a quote.

As we go forward into spring and the summer months, please remember that we have specialist LMR members that are supplies of labour that can undertake various tasks that include grain store cleaning and roguing etc. LMR is always strong in the supply of gang labour as we have an extremely large number of requests year on year. All of the suppliers are of course GLA licensed.

Whatever requirement you have whether that is for a service, a product, contracting work etc., do please contact LMR as we will always endeavour to assist you.

In the meantime, please put the Lincolnshire Show in your diaries. We hope you can join us over the course of the two days on the LMR stand. LMR members are invited to our Champagne Reception on Weds 22nd June to celebrate LMR's 25th year anniversary. Further details will follow in future newsletters.

With kindest regards

Andrew & Jayne

Experienced LMR members available for cultivations and any other work that needs undertaking

FUEL * FUEL * FUEL

Gas Oil - Derv - Kero

We always have competitive daily prices
Now is even a better time to buy as prices are low

Call LMR with your fuel requirements

Business Electricity & Gas – Reducing Costs

It's time to take advantage of the fact that Oil and Gas prices have come down to their lowest quarterly average since 2010.

- Wholesale Electric is 20% lower than it was at the start of 2014 and gas is 37% lower.
- The most expensive business electricity tariff costs around 65% more than the cheapest and 40% of businesses haven't switched supplier in the last 5 years.
- Our LMR specialist member goes to market to source the lowest fixed price contracts from all suppliers and have saved an LMR member in excess of £10k a year.
- Many people are agreeing a new contract long before their current one ends in order to lock today's rates for the future. Don't wait until your renewal date.
- Most businesses' supply number begins with 03 or 04. If your supply number begins with 05, 06, 07 or 08, it's important to be aware that a new industry change affecting 160,000 meters in the UK (April 2017) will affect you and you'll need to take advice on changing to a half hourly supply.

This LMR member can provide this advice and assist with the change. It's called P272.

Please contact Jayne or Andrew for details.

Rainwater Harvesting

Make the most of the free rain.

LMR specialist member in design, supply and install of rainwater harvesting for the agricultural industry.
