MANAGER'S MESSAGE

We hope this newsletter finds you in good health and enjoying time away from the travails of farming. We will be going into the 2020's wondering what the decade will have in store for us. However, there will be opportunities develop as we adapt to life outside of the EU and in the post CAP world. The climate is bringing its own set of challenges, whilst the availability of crop protection and animal health products is restricted. I expect the transition will take some careful navigation, but I am sure there will be a diverse agriculture industry that we can flourish in, in times to come. Our industry has gone through many periods of change. I doubt many of us would want to step back in time and have our industries locked in the past. LMR will be changing too, endeavouring to help members find cost effective solutions and opportunities for your businesses.

Thank you to all those members that supported the LMR Conference on the 25th November. It was pleasing to see so many of you taking the time to thank us for hosting the event and for securing a top-notch line up of speakers. We hope you took away a few new ideas on how to think about and plan for changing times. For me it was that investment in machinery is now over £300/ac and rising. Working with other farmers and rationalising machinery inventories controls costs, brings enjoyment back into farming and frees individuals to spend more time on the things they are good at. This could well be part of the solution for many farms when margins for the average arable farmer are zero before rent, finance and BPS. LMR has a key role to play, allowing you access to a vast pool of machinery and skilled operators at very competitive prices.

LMR is extremely pleased that the deals with Spaldings and Pan Anglia have additional discounts for you in the New Year. They are time limited so please check your requirements for wearing parts, PPE and tools etc. and ring them through. The winter season has a few months to run with temperatures likely to drop below current levels. Some members will have summer grade gas oil left in tanks which is very vulnerable to waxing. The ideal solution is to use winter grade gas oil from a separate tank. If that isn't possible, adding and mixing in anti-wax additive will give some protection to summer grade gas oil. Mixing winter and summer grades may not work as the two settle out.

You may be looking at new tyres/wheels for your machinery to reduce soil damage in the spring. LMR has Mitas/Trelleborg offering discounts as well as group deals with Lodge Tyres, Tanvic Tyres and Bush Tyres.

Thank you for supporting LMR through 2019, it is a great pleasure to work for you. We wish you all the very best for the Christmas period and the year ahead.

Andrew & Jayne
