## MANAGER'S MESSAGE

LMR celebrates its' 30-year anniversary. We wish to sincerely thank all past and present members, directors and managers for their contribution to this achievement. You have all played your part on this journey that has molded our co-operative into the successful and dynamic business that it is today. We have assisted with so many successful contracting operations with machinery and labour, aiding members to meet their business goals. The many millions of litres of fuel delivered across the region to your homes, driers and farms has been made possible thanks to the competitive pricing and high service levels of our suppliers. The same can be said of the suppliers of lubricants, ad blue, filters, wearing parts, plant and tractor hire, concrete and aggregates, seed, fertilizer and sprays to name a few. Those 30 years of trading on your behalf have enabled us to fine tune the services and suppliers to match your requests. We are similarly proud of the many consultants, brokers and advisors that have assisted members with their imparted knowledge.

We look forward to working with you all this year, finding effective solutions to your many varied requests. Much of the time we are facilitators, matching up the services and machines that one member provides, with the request from another. So much of LMR's success is down to the skills and cost-effective solutions that you offer to each

other. Please remember that the best solution for your business may well come from the services offered by another LMR member. Support each other and grow together. The future holds many exciting challenges. Just as agriculture has changed since 1991, it will surely make transformational changes in the next 30 years. One can foresee robotics becoming mainstream in arable and livestock enterprises and the use of artificial intelligence in agronomy and plant breeding. The industry will be decarbonizing and growing new crops for food and environmental enhancement. There will no doubt also be innovations that we cannot even imagine at this time. Farms will continue to increase in size, but perhaps machinery will be owned and operated in different ways by third party specialists. We, at LMR look forward to making this journey with you. Call us with your requests for contracting requirements and input needs. Tell us about the new machinery and services that you have to offer. Together we will find better solutions and make your businesses easier to manage and more profitable.

Kind Regards

Andrew & Jayne
