MANAGERS' MESSAGE

The arable harvest is completed for another year with average yields for most crops. The brave few that stuck with oilseed rape were rewarded with reasonable yields and high prices which has attracted an increased acreage for the 2022 harvest. The September rains will be welcome by many for a host of reasons. Many members will be moving on to potato and sugar beet harvesting campaigns. We hope both have better market prices than previously, now that the economy is opening up again. However, it appears that somethings really have changed and the 'just in time' model that we have lived with for years has broken down caused by the shortage of components, staff and stressed distribution networks. Farmers are already struggling to get grain and livestock moved off farm. We hope the lorry driver shortage doesn't draw people from agriculture as finding good staff is already a challenge.

Members have kept LMR busy with request for inputs. There have been significant volumes of fuel, ad blue and gas bought to enable the harvest effort. Some fuel companies have struggled with COVID, driver shortages and lorry breakdowns. Fortunately, as LMR deals with multiple suppliers, in nearly every case we have been able to supply fuel as requested. In fact, we have gained members and volume on the back of the strength of our fuel sourcing model. We would like to thank our suppliers for their tremendous support through this difficult period getting supplies out to

members. We would also like to express our sincere gratitude to members for their patience and understanding through this fuel supply/demand crunch.

Please call with your farm contracting and building requirements. We have so many members offering very competitive prices for modern machines with skilled operators looking for work. Using a contractor is often the most cost effective and flexible way of completing tasks. It also resolves the difficult problem of finding reliable operators.

Kind regards

Andrew & Jayne

**YOU WILL FIND THE LMR STAND
WITHIN
THE GEORGE STEPHENSON
EXHIBITION HALL
WE LOOK FORWARD TO SEEING
YOU THERE**

LMR Serving the East Midlands

SEASONAL TOPICS – LMR CAN HELP YOU WITH
HEDGE CUTTING - SUGAR BEET / POTATO LIFTING – CULTIVATIONS - BUILDING REPAIRS – TRAINING

Rebated gas oil – legitimate uses to change in April 2022

Please be aware that the legitimate uses of gas oil is changing. Agriculture is unaffected, however if you use gas oil on building sites or in other non-agricultural sectors, you will have to change to using HVO or derv. The HMRC can give specific advice if you are unsure of your situation. Vehicle and bulk tanks on non-agricultural work will need to be switched to HVO or derv by April 1st 2022. We understand that tanks do not need to be cleaned of all residue gas oil, however you should make every effort to empty tanks and document your actions. You will need to be especially careful where vehicles move between qualifying and non-qualifying jobs and specific HMRC advice may be required. This legislation is not a VOSA based one, but on environmental/pollution grounds. We have guidance notes which we can share with you. We will continue to guide you on this subject. However, the rules are not finalised yet, so advice is for guidance only. Please note the changes may have effects on your credit limits and cash flows.

Petrol E5 changed to E10

The recent changes to petrol with it going from a 5% ethanol inclusion to a 10% inclusion will have consequences for most things other than modern cars. If you are buying fuel for mowers etc. you should consider super unleaded as the replacement.

SNOW CLEARANCE

Interested in undertaking snow clearance?
