MANAGER'S MESSAGE

Welcome to the Spring newsletter. Some of you will have spring drilled crops emerging while autumn plantings respond to fertilizer, longer day length and increased temperatures. We all hope for healthy crops and high yields to offset depressed forward crop prices.

The recent news that SFI applications will not be processed until new funds become available is a serious blow. Many businesses have put a lot of time, effort, and expense into preparing applications and now have no idea when they may be able to start them. Cropping plans will be in disarray and land coming out of mid-tier schemes will also be stuck, not being able to be rolled over into a new scheme. The net effect is lost income when farmers can least afford it. It does seem that farming and food production have fallen off the governments radar.

LMR has a deep pool of farmers and contractors offering contracting services to assist with cultivations, drilling and spraying of any additional land that may need to be rushed into spring crops. These services are available year-round to support arable, root and conservation operations. If you are considering a reconfiguration of machinery assets to reflect the economics of crop production or a shift to SFI schemes, please consider the contracting services available from LMR members. Livestock farmers can access umbilical spreading teams through LMR. Please call us with your requests. We also provide seed and fertilizer from a number of regional and national merchants at very competitive prices.

I am pleased that LMR is on target to achieve another successful year, assisting many members with contracting services and supplying essential inputs, leaving a sustainable monetary surplus for the long-term viability of LMR. Fuel and AdBlue

and wearing parts have been particularly popular with members. Thank you all for your support. We are focused and motivated on providing a quality service and meaningful savings for you and your businesses.

We will soon be organising gang labour for grainstore cleaning and roguing blackgrass and weed beet. Please call us to book in a team as labour is a finite resource and timeliness is important for your requests.

It is so encouraging that members have embraced the wearing parts group deals that we have negotiated for you with Spalding's, Pan Anglia, APM and Knight Farm Machinery. You are turning over significant sums and consequently making significant savings on maintaining machinery. Please call us for details if you have not already benefitted from these generous schemes.

We are keen to discuss bulk AdBlue supply with you. If you are a large user, there are significant savings to be made. Bulk tanks can be provided at subsidised prices as part of the deal. LMR has had great success with IBC AdBlue supply and anticipates emulating this with bulk supply.

Please remember LMR for gases for heating and workshop applications as we have very competitive options for you. We are keen to quote on your workshop consumables too.

We look forward to seeing you at the Lincolnshire Show. There will be the usual refreshments and a chance to rest your weary legs while we catch up on your news and requirements. These are two days of the year that we particularly enjoy.

Kindest regards

Andrew, Jayne & Viv

When riding ATVs, remember these nine points to ensure a safe riding experience:

1. Always wear a suitable helmet, goggles and gloves, as well as long sleeved clothing and over the ankle boots.
2. Complete a pre-riding inspection. Check the vehicle for loose, broken or incorrectly adjusted items before you start riding.
3. ATVs are designed to be driven off the public highway. Never ride on paved roads, except to cross when permitted by law.
4. Ride an ATV that is suitable for your age and experience – be sure to supervise ATV riders under 16.
5. Never carry passengers on single-rider ATVs, and no more than one passenger on ATVs designed for two people.
6. Ride only on designated trails and at a safe speed. Be sure to share your journey with others before riding.
7. Never ride on the influence of alcohol or drugs.
8. Read your owner's manual and familiarise yourself with the warning labels on your vehicle.
9. Always ride within your own capabilities and those of your vehicle.
